the study of the brain mind complex has been hampered by the dichotomy between objective biological neuroscience and subjective psychological science this book presents a new theoretical model for how to translate between the two using a third language nonlinear physics and mathematics it illustrates how the simultaneous use of these two approaches enriches the understanding of the neural and mental realms

in 1872 a woman known only as an earnest englishwoman published a letter titled are women animals in which she protested against the fact that women were not treated as fully human in fact their status was worse than that of animals regulations prohibiting cruelty against dogs horses and cattle were significantly more punitive than laws against cruelty to women the earnest englishwoman s heartfelt cry was for women to become animal in order to gain the status that they were denied on the grounds that they were not part of mankind in this fascinating account joanna bourke addresses the profound

question of what it means to be human rather than animal how are people excluded from political personhood how does one become entitled to rights the distinction between the two concepts is a blurred line permanently under construction if the earnest englishwoman had been capable of looking 100 years into the future she might have wondered about the human status of chimeras or the ethics of stem cell research political disclosures and scientific advances have been re locating the human animal border at an alarming speed in this meticulously researched illuminating book bourke explores the legacy of more than two centuries and looks forward into what the future might hold for humans women and animals

in 18th century germany philosophers were occupied with questions of who we are and what we should be can the individual fulfill its vocation or is this possible only for humanity as a whole is significant progress towards perfection in any way possible for me or just for me as part of humanity by following the origin and nature of these debates this collection sheds light on the vocation of humanity in early german philosophy featuring translations of spalding s contemplation on the vocation of the human being in its first version from 1748 and an extended translation of abbt s and mendelssohn s epistolary discussion around the doubts and the oracle from 1767 newly commissioned chapters cover johann gottfried herder s inherently cultural concept of the human being immanuel kant s transformative interplay of moral and natural aspects and the notion of metempsychosis in fichte s work inspired by two neglected philosophers gotthold ephraim lessing and johann georg schlosser opening further lines of inquiry contributors address questions about the adaptations of spalding s work that focus on the vocation of women as wife mother or citizen exploring the multitude of ways 18th century german thinkers understand our position in the world this volume captures major changes in metaphysics and anthropology and enriches current debates within modern philosophy

rutherford describes the book of humans as being about the paradox of how our evolutionary journey turned an otherwise average ape into one capable of creating complex tools art music science and engineering it s an intriguing question one his book sets against descriptions of the infinitely amusing strategies and antics of a dizzying array of animals the new york times book review publisher s note the book of humans was previously published in hardcover as humanimal in this new evolutionary history geneticist adam rutherford explores the profound paradox of the human animal looking for answers across the animal kingdom he finds that many things once considered exclusively human are not we aren t the only species that speaks makes tools or has sex outside of procreation seeing as our genome is 98 percent identical to a chimpanzee s our dna doesn t set us far apart either how then did we develop the most complex culture ever observed the book of humans proves that we are animals indeed and reveals how we truly are extraordinary
