philip larkin 1992 1985 is today acclaimed as a british national cultural icon historically a movementeer larkin followed the pleasure principle to democratize poetry by forging a distinctive philistine aesthetic by employing a defiantly demotic diction and by building his poems around a structure of rational discourse philip larkin poetry that builds bridges is a well researched and immensely readable book it is perhaps the only work available today that offers a comprehensive critical account of the full range of larkin s poetry a significant contribution to larkin studies this book provides a between the lines analysis of almost all the poems embodied in the four major collections of larkin the north ship the less deceived the whitsun weddings and high windows by exploiting the resources of larkin s letters his prose writings and his biography the author traces much against the grain of contemporary larkin criticism the poet s thematic attitudinal and technical

development from one book of his poetry to the next and shows the trend of larkin s evolution with a holistic approach to the total corpus of larkin s poetry the author perspectivises the poet and argues the larkin s achievements lie in his success in building bridges between aestheticism and philistinism between empiricism and transcendentalism between classicism and romanticism between modernism and postmodernism between the native british poetic tradition and the anglo franco american experimental line and above all between poetry and the reading public this book also contends the larkin s vision of life is neither pessimistic nor optimistic but tragic and melioristic
